Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 1a-1b should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 4-6 are rejected under 35 U. S. C. 102(e) as being anticipated by Prall et al. (US Pat. 6,624,024, herein after Prall).

Regarding claims 1 and 5, Prall discloses in figs. 3-5 a method of fabricating a memory cell and a memory cell structure comprising: forming a plurality of gate areas, the gate areas

including a gate oxide 16, a floating gate 18, an insulating layer 20, and a control gate 22 (fig. 3 and col. 4, lines 56-61); forming spacers 48 on sidewalls of the gate areas to isolate and protect a gate area including a floating gate and a control gate (col. 5, lines 15-27); forming a gap filling layer 50 over a substrate including the gate area and the spacers (fig. 5 and col. 5, lines 36-40); and depositing an insulating layer 52 over the gate areas and the gap filling layer (col. 5, lines 41-43).

Regarding claims 2 and 6, Prall discloses that the spacers 48 are formed by depositing and etching a SiN layer (col. 5, lines 15-27).

Regarding claim 4, Prall discloses that the insulating layer 52 is formed of BPSG (borophosphorsilicate glass) (col. 5, lines 41-43).

Allowable Subject Matter

3. Claims 3, 7, 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest, either singularly or in combination at least the limitation of “the gap filling layer is formed of undoped polysilicon or amorphous silicon” as recited in claims 3 and 7.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1798.
